

NON-FICTION

A hiking guide to load on your easy to carry tablet or phone! How to get there directions, some with GPS coordinates.

“Wealth can be defined in many ways. Wealthy in monetary means, in love, in sights, sounds and many other treasures that surround us.

Southeastern Arizona is rich in ghost towns, flora, fauna and western history. Those of us who have been fortunate enough to have visited many of the remnants of towns and mining sites long gone, have indeed stored up some long lasting memories we can treasure for many years.

When the desert blooms here, many plants put forth the most incredible pallet of color which shouts, this is not a god forsaken land, but an amazing land.

From the hundreds of petroglyphs left by Native Americans, to the scars of overburden left by mining companies, numerous persons have occupied Southeastern Arizona and left behind their mark on the land.

I am thankful I was able to spend so many weekends exploring the sights and sounds of such a wonderful area. I was richly blessed.” **Jay Brenner**

REVIEWS

“In a nutshell: I love your book. In fact it just took me a couple of days to read it. It grabbed my attention from the first page. And the images are as attention grabbing as the text. Every ghost town started a string of thoughts in my mind which can be converted a novel. I was especially enchanted by Charleston. The names from the gravestones resonate in my mind. Thanks for sharing everything. Maybe one day I can actually visit these sites. You are lucky that you already have.” **Sabine Shah**

“Jay Brenner, author of the Midnight Blue suspense trilogy, has added yet another genre to her writing repertoire. Over many years, while living in Arizona, the author enjoyed exploring old ghost towns of Arizona, either with her husband, Steve, or with a friend, both of whom shared her curiosity and enthusiasm for hiking and history. In this book, a product of the many expeditions, hours of photographing, researching, and documenting her experiences, the author has created a guide for those who come behind. Jay Brenner offers sage advice to the novice and experienced hiker/explorer, detailed instructions to help them get to the sites she has visited, breathtaking pictures, and background history of each ghost town, and a few that, well, aren't quite. *Southeastern Arizona Treasures* is a compelling read and a history lesson on the rise and fall of settlements in Arizona. A long time in the making, it reveals yet another facet of the author's insatiable curiosity. This work is a lasting tribute to the places Jay Brenner has visited and to the people who spawned these settlements, whose stories she resurrects. This work is a lasting contribution to the unique and fascinating history of Arizona, and offers an incredible opportunity for the reader to live Jay Brenner's steps vicariously, or to follow in them.” **Carolyn Kittle**

“Our family jeeps and camps Southern Arizona frequently, and one of our favorite activities is collecting minerals and identify tree species in our area. I wanted to comment, well done on the hiking guide.” **Dan Riordan**
